SPEED UP YOUR CODE

WHICH "TICKET"
are you going after—

AMATEUR? COMMERCIAL?

THE CANDLER SYSTEM has trained a vast army of fellows during the past 25 years for their Amateur and Commercial Exams. The sun never goes down on this immense army of skilled amateur and commercial operators. They are located in all countries of the world. WHEN YOU ENTER THE INSPECTOR'S OFFICE to take your exam., wouldn't you like to go in with that feeling of CONFIDENCE which always accompanies ABILITY? You can do this if you learn code RIGHT as it is taught by Candler SCIENTIFIC CODE COURSE. This COURSE teaches you all the necessary FUNDAMENTALS of code scientifically.

Plenty of Opportunities in Commercial Operating

Many amateurs are entering the field of commercial radio communications through CANDLER specialized training, which is, in fact, the short cut to speed and operating efficiency.

Many amateur and commercial operators, embarrassed by their inability to "hit the ball" have so increased their code and "mill" speeds with a few weeks' CANDLER training, they have not only won the admiration and respect of those with whom they work, but have been promoted to better jobs where speed is demanded and paid for.

With CANDLER training you can easily and successfully meet the new conditions and speed requirements in commercial communications. The training is inexpensive, and you can take it in the privacy of your home or while on the job without others knowing it until you surprise them with your increased speed.

TED R. McELROY

Official Champion Radio Operator of the World, says:

"The Candler System is the only training I ever had for any of my championship code contests. This system taught me to read code by sound as readily as I read book print by sight, and to put it down on my 'mill' by touch, as fast as it comes, without having to think of how words are spelled. 'Co-ordination and Concentration are necessary to the handling of code at all speeds. The CANDLER SYSTEM in this respect is unique, scientific, exact. I recommend the CANDLER SYSTEM to those who wish to learn code right, to amateurs and commercial operators who want speed."

Whether you want to learn code or increase your speed to championship caliber, CANDLER training in your own home will enable you to realize your ambition quickly.

ALL-WAVE RADIO MAGAZINE

Has as nice a sewing circle of Hams cutting ends off antenna wire, doubling in finals and taming the high frequencies, as you ever saw. These babies are sweating Asia out of ten-meter coils where Asia didn't exist before. They're doing real, practical stuff—stuff that's easy to copy. And it's all going right into ALL-WAVE RADIO. Did you see Reinartz's 5-Meter Rotary Beam Antenna in the February issue, or the simple Long-Lines Oscillator? Good, you'll admit. Well, there's lots more coming, so why not subscribe now and you won't miss a bet!

Air Trimmers vs. Mica

Aladdin supplies both types with Polyiron core i-f coils. In Aladdin Polyiron core transformers air dielectric trimmers offer a slight advantage in selectivity and frequency stability, while transformers with mica dielectric trimmers are more compact and economical.

The important factor is the core of the transformer. Polyiron in the core reduces the amount of Litz wire necessary for a given inductance—thus reducing resistance and distributed capacity which are of greater importance than the trimmer dielectric.

Popular Aladdin Polyiron i-f Transformers

Air dielectric trimmers, shields, 4"x1 7/8"x1-7/16". List \$5.50.

HIGH IMPEDANCE—2000 OHMS
THIS MICROPHONE IS HIGH ENOUGH IN IMPEDANCE TO OPERATE DIRECTLY INTO GRID... BUT NOT HIGH ENOUGH (ONLY 2000 OHMS) TO INTRODUCE SERIOUS LOSSES IN LINE UP TO 200 FEET.

Requires no pre-amp when used with regular high gain amplifier (100 DB). Replaces condenser and crystal microphones. **NO CHANGES** or additions necessary. **ELIMINATES INPUT TRANSFORMER** and its losses. Therefore requires 12 db. less overall amplification. **ELIMINATES INDUCTIVE HUM! ELIMINATES FEEDBACK!** Lifelike brilliance! Excellent on close talking.

it's a Landslide for CENTRALAB

Every serviceman from coast to coast knows Centralab... everybody's his friend and the worst thing his enemies can say is that he's a mighty smooth article. Yes... he's smooth all-right... and it's that famous non-rubbing contact that makes him "that way." ... a tip from campaign headquarters: a mere handful will service practically any set ever made... "better than ever before."

"take it from me"

says Colonel (to you) Centralab, impresario of a million radio recitals, "when I say I give the dear public a smooth performance I mean just that. Yes suh, as smooth as a pre-prohibition potation!!"

Ham-shack hermits as well as torrid tube changers will heed the Colonel's advice to stick to Centralab RADIOHMS and FIXED Resistors.
